## EDUCATION

---

**St. Francis Institute of Technology 2022-2026**

**Borivali, Mumbai**

*Bachelor of Engineering in Computer Engineering (CGPA 9.09)*

## EXPERIENCE

---

**Meta CraftLAB Intern**

*1st June - 12th July, 2024*

- Full Stack Development Internship, where I got a chance to learn svelte kit and develop my own project.
- Clearing daily svelte fundamentals and svelte-kit fundamentals.

**ExpoSys Data Labs Intern**

*1st June - 5th July, 2024*

- Front-End Development Internship, develop my own Food recipe provider application called FOODMA.
- Gained hands-on experience of APIs.
- Multi-page responsive Website.

## PROJECTS

---

**Weather App**

**Live | Code**

- Developed a Weather App using HTML, CSS, and JavaScript, incorporating API integrations to provide real-time weather data.
- This project honed my skills in front-end development, API usage, and managing project timelines efficiently.

**TicTacToe Game**

**Live | Code**

- The user-friendly interface ensures an enjoyable experience, making it accessible for players of all ages.
- The game exemplifies the user's skills in coding and game design, providing a seamless and interactive experience
- Implementation of Single Player Mode.
- Responsive to any screen size.

**FOODMA**

**Live | Code**

- FOODMA is a web application designed to help users discover and explore recipes based on their preferences and dietary needs.
- It leverages the Edamam API for recipe search functionality and the Spoonacular API for detailed recipe instructions, aiming to provide a comprehensive platform for culinary enthusiasts.
- Multipage, Responsive, Using local storage to store your Favorite Recipes.
